ABOUT ESCOCHECKS PHILIPPINES

Escochecks Philippines Company, Ltd. is a wholly owned subsidiary of Escochecks Inc. in the USA. Escochecks Philippines is a business service provider with core competencies in the fields of accounting, bookkeeping, finance, taxation, payroll, and HR, among others. We offer these services to our clients with the aim of being their partners in driving business growth and efficiencies.

ABOUT ESCOCHECKS ACADEMY

Escochecks Academy is the training arm of the Escochecks Group of Companies which handles accounting, bookkeeping, payroll, taxes & human resources functions for various businesses in Los Angeles, Las Vegas and Manila. The academy is also an accredited continuing professional development (CPD) provider under the Professional Regulation Commission (PRC) in the Philippines.

Currently, it is working on its accreditation with the Internal Revenue Service (IRS) and California Tax Education Council in the U.S.

Core to the academy's course offerings are continuing development programs which could help entrepreneurs and professionals manage their business and career opportunities better. We also offer introductory courses on how to use QuickBooks which is specially designed for SMEs who want to manage their finances on an integrated platform.

Accounting for Non-Accountants (Accounting for Current Liabilities, Partnerships and Corporations)

The program aims to make the participants understand and appreciate accounting for a company's current liabilities as well as accounting for businesses organized as a partnership or corporation. The course will introduce participants to various concepts under generally accepted accounting principles.

Specific accounting treatment for current liabilities common to SMEs such as notes and accounts payable, overview of payroll, provisions and contingent liabilities would be discussed. Students would learn to analyze and record transactions specific to these accounts. Students would also be taught how to adjust account balances and report these accounts in the financial statements. Students would also be given an overview of partnership and corporation accounting.

This course is recommended to business owners and managers as well as non-accounting professionals who want to expand their career opportunities in accounting and finance.

Through this certificate course, the users will be able to use accounting information in their decision-making processes.
